# SAP Netweaver & Java Developer

---

## Objective

I am poised to work for a growth-oriented organization to deliver pragmatic results in the area of Information Management Systems, thus being a conducive element in achieving the organizational goals. Effectively grooming the knowledge and skill through the work experience.

---

## Profile

- 9 years of proven IT industry experience of design, development and implementation of web portals and applications using ABAP, SAP Netweaver and Java technologies.
  - Effectively executed a number of full cycle SAP ERP, EP and PI implementations.
  - Led development teams to many successful projects.
  - Involved in hardware and software sizing and team development.
  - Involved in electronic data interchange analysis and implementations.
  - Involved in optimizing and securing applications and data.
  - Involved in writing business blueprints and software requirements documents.
  - Involved in writing and executing test cases.
  - Involved in high level management and technical meetings with customers.
- 

## Skills & Expertise

- Sun Certified Java Programmer.
  - Strong Knowledge of ABAP Objects, Data Dictionary, ABAP workbench, Debugger, SAP Script, Smart Forms, SAP Query, Enhancement framework, LSMW.
  - Strong knowledge of Java Standard and Enterprise applications.
  - Technical expertise of SAP SD, MM and FI functional modules.
  - Strong object oriented programming and design pattern concepts.
  - Strong knowledge of WebDynpro Java/ABAP development.
  - Strong Knowledge of Portal development and Administration.
  - Good Knowledge of Visual Composer based applications development for BI and SAP systems.
  - Good knowledge of SAP Process Integration (XI) Builders & Configuration, Adapters, System Landscape Directory and scenario development.
  - Strong data manipulation and exchange techniques.
  - SAP Integration with PHP and Java web applications.
  - Strong Knowledge of web application development, deployment and hosting.
- 

## Employment

Pakistan State Oil  
Company Limited

June 2010 - Present

### Lead SAP Netweaver Developer

I am working as lead SAP Netweaver developer, responsible for:

- Management, analysis and implementations of SAP R/3 changes and enhancements to run business process effectively.

- Maintenance and development of Online Order Management System developed using Enterprise Portal.
- Managing and administering the EP and PI servers.
- Optimizing SAP programs, reports and applications.
- Securing of SAP applications and data.
- Train and guide junior ABAP resources.

Successfully implemented multiple SAP sub-projects:

Online Order Management System: Incorporated new changes into the system. Branding company portfolio using theme development. Integration with new banks for payment processing.

Retail Discount Scheme: In this scheme discounts are given to customers who have good sales history and their billed quantities crossed the threshold values maintained. To implement this we modified the pricing conditions using user exits.

Credit Check Validations: In SAP R/3 at PSO we face a strange bug of negative sales value while calculating credit exposure, which is virtually impossible to solve. We developed a work around and calculated credit exposures using open sales order, deliveries, and receivables of current month along with summary tables for previous months.

EDI payments: Currently working to automate vendor payments process with two banks. Both these solutions are based on PI to PI IDocs transfer for payments and processing the returning IDocs to complete the payment process.

Analytical Dashboard: Successfully implemented the dashboard for top management. Dashboard is a flash based Enterprise Portal application that displays real time sales, stocks and receivables information. In this project SAP ERP integrated with EP using Visual Composer.

Siemens (Pakistan)  
Engineering Co. Ltd.

Nov. 2007 - May 2010

## SAP Netweaver Technical Consultant

Based on my Java & J2EE experience I got the opportunity with SIEMENS to explore SAP ERP and Netweaver platform. I started my SAP career with Enterprise Portal and Process Integration implementation, first of its kind in Pakistan, then moved to ABAP developments.

Pakistan State Oil - Online Order Management System: It was the first EP project implementation in Pakistan. We have used WebDynpro Java to implement project. I worked as the lead developer to implement and manage portal interfaces and administration as well as responsible for PI implementation to integrate external banking systems for payments and R/3 order placement and processing.

- Developed web interfaces for order processing using WebDynpro Java.
- Implementation of Enterprise Portal applications.
- Administered enterprise portal and process integration.
- Developed and configured KM scheduler to process future orders and notifying fulfillment system(R/3 system).
- Developed Reports for online orders using WebDynpro Java.
- Integrated the external third party PDF Java library to generate printable and downloadable versions.
- Configuration, implementation and administration of Exchange Infrastructure to communicate with external bank interfaces for online transactions.
- Implemented RFC, SOAP, FTP, JDBC and EMAIL scenarios.

PAK ARAB Refinery Ltd. (PARCO): Involved in Process Integration sizing, configuration and implementation. Implemented RFC, SOAP and JDBC scenarios. Also

configured the JDBC driver for direct database connectivity with Oracle database server.

Higher Education Commission: Involved in requirements gathering for the Enterprise portal project to assist students, PhD supervisors and faculty persons to apply to HEC programs announced time to time. Prepared the business blueprint document and built a prototype of the project. Led and assisted the development team during the execution of the project.

Getz Pharma Private Ltd.: Worked remotely as an ABAP consultant. Designed and implemented various reports and scripts related to the MM and SD Module.

Colgate Palmolive Ltd.: SAP SD, MM and FI reports, scripts, uploads and worked closely with functional consultants to produce desired results. Implemented different enhancements using enhancement framework.

SIBISoft (Private) Ltd.

Sr. Software Engineer I

Sept. 2005 – Nov. 2007

At SIBISoft I utilized my experience gained from previous jobs and improved management skills. I started with Mid-level developer and promoted to senior developer. I was responsible:

- To analyze and understand the client's requirements and system's business processes.
- To develop the fully functional application and assist the team.
- To optimize J2EE web applications for better performance.
- Secure web applications using SSL and other security techniques.
- Implemented electronic data interchange applications.
- Developed data import and export framework.
- Developed the prototype of patch and release builder.

### **Projects:**

Northstar Club Management System: Northstar Club Management System is company's own product providing management Information System for hospitality Industry. Northstar has been implemented in over 100 country & city clubs in United States & Canada. I have been working on data application custom tools module, to import clients data, patch builder, files tagging and versioning utilities.

GoSMILE – Ecommerce and Web Portal: Go SMILE was a web and ecommerce portal. This system includes the basic functionality of an E-commerce system and other advance functionalities and EDI processes. I led this project as a lead developer and involved with the client directly to gather and document requirements. Also managed and guided development and QA teams.

SmartOnline – Accounting Application: It was a web based application to maintain general ledger accounts of small/medium businesses. Besides G/L double entry accounting it has advance features like integration with external authentication and authorization system, excel based data migration/import and installation wizard and data migration processes.

IOXphere Technologies  
(Private) Ltd.

Web Developer

Feb. 2004 – Sept. 2005

I joined IOXphere as a junior programmer and learned J2SE and J2EE technologies and groomed my skills as web developer.

- To discuss and document the system requirements and processes.
- To analyze and understand the client's requirements and business processes.

- Develop and implement projects as a member of team.
- To provide support to clients for the developed software.

**Projects:**

TeamPASS: A web based project management application. TeamPASS system provides diverse functionalities like Project Planning, team development, Tasks management and tracking, Issues/Bugs Tracking & Management.

Time Tracker: Time Tracker is a web based Timesheets management System. Attendance management, Managing tasks, hours spent on each task, timesheet submission, wages calculation and email alerts. System also ensures that timesheets are as accurate and up-to-date as possible.

Bug Tracker: A web based bug tracking system. Features included are: project management, user management with ACL (access control list), bugs management, Email alerts and notifications along with statistics.

E-Dev Technologies

Software Engineer

May 2003 – Jan. 2005

I started my career with E-Dev technologies. I was responsible:

- To analyze and understand the client’s requirements and business processes.
- To develop initial prototype of the project.
- To assist development team during development phase.

**Projects:**

Bank of America (Electronic Accounting Government Ledger System, EAGLS): An Online Credit card verification system. It’s a very secure online system with only privileged user access. It directly interacts with the Main Frame System of Bank of America.

XML Based Web Application Development Tool: It is an in-house developed project named as IDEA (Integrated Distributed Enterprise Application) application generator. It is used to develop rapid web application prototypes called POC (Proof of Concept).

Education

M. S. Software Project Management

July 2006 – June 2009

National University of Science and Emerging Technologies

B. S. Computer Engineering

January 1999 – December 2002

Sir Syed University of Engineering & Technology
